I'll look into which office/person at BIA has jurisdiction. My understanding is that the original BIA person associated with the Pineview development project and lease agreement, Curtis Milsap, is now retired.

It is now time to bring in BIA. Aaron, can you set up a call - unless you prefer to make the contact yourself.

Subject RE: Pineview Highest Allowable Results

I think everyone thinks the homeowners association owns it. PTP packed up and left. I was worried that they did not jump through any hoops before they left. What should we do now?

Subject: Re: Pineview Highest Allowable Results

see page 8 of the permit, Section D.2.a.ii. If effluent concentrations for TSS, BOD and N-N exceed the stated limits, re-sampling and notification to EPA are required. Detection of Fecal Coliform or Nitrates in the monitoring wells (see Section D.2.a.iii) has the same requirements. I know that this permit is not the easiest permit to follow, and that will change once we re-issue it.....but first we have to find out who currently owns the wastewater infrastructure; any ideas?

Pineview Highest Allowable Results

Aaron,

Where can I find the highest allowable results for the sampling for Pineview? I need to know when the results are too high for EPA standards.

I need to know for the following:

Total suspended solids in mg/L

Nitrate Nitrogen in mg/L Biochemical Oxygen Demand in mg/L Total KJeldahl Nitrogen in mg/L

It was never part of the permit and I need to be sure I respond correctly if the results detected in sampling are too high.

Can you help?
